ABOUT ME

I specialize in crafting engaging and user-friendly interfaces. Proficient in languages such as HTML, CSS, and JavaScript, my primary focus lies in creating visually appealing and intuitive user experiences. Dedicated to staying updated with the latest design trends and best practices, I am committed to delivering seamless and responsive web applications that captivate users and elevate brand experiences.

SKILLS

PHP jQuery Ajax MySql

HTML CSS

JavaScript Node js

C

EXPERIENCE

On **23th December 2023**, I started working on a website of an application whose name would be **FlyBetter**, thus the name of the site: **FlyBetter**.

I worked on it for some days and when the site was finished, I had other ideas in mind.

I made various social media clones and put them all together under the same project which came to be known as **FlyProject**. Therefore, all the below are under one vast project named **FLYPROJECT**.

- Dec 2023 – FlyBetter: An aviation-related application's website
- Jan 2024 – FlyConnect: A Facebook clone
- Jan 2024 – AeroLink: A LinkedIn clone
- Feb 2024 – FlyTube: A YouTube clone
- Feb 2024 – FlyFlix: A Netflix clone
